Cherries give quick results (page 22)

### PLANT THIS FALL

Experience has shown there is a big advantage in fall planting of almost all varieties of hardy trees, shrubs and flowers. The earth becomes settled about the roots, new feeding rootlets are formed before severely cold weather, and they are ready to start into growth with the first coming of spring.

Planting of Peonies and Irises may begin in early September, other Hardy Flowers and Evergreens usually later September or early October, Shade Trees and Shrubs when the leaves start dropping naturally.

# SARCOXIE NURSERIES PEONY FIELDS

## WILD BROS. NURSERY CO.

Sarcoxie, Missouri

Flowering Almond, very showy in early April

## Hardy Flowering Shrubs

Mail sizes, postpaid. Mail sizes, while not as large as the other grades, are sturdy, well rooted young plants and, given time and reasonable care, give good results. If larger sizes are wanted by mail, postage is additional. Shrubs larger than 3 to 4 ft. can seldom be sent by mail.

Five or more of a kind at the 10 rate, less at each rate.

**Abelia grandiflora.** White to light pink fragrant flowers like small Weigelas, from early summer till fall; small, glossy, dark evergreen leaves. 12 to 18 in., 60c each.

HYBRID LILACS

The Hybrid Lilacs bloom younger than the old Common Lilacs, often the year after planting, and are more varied in color. For fragrance and freedom of bloom in April nothing can surpass Lilacs. A location in full sun is best.

**Alphonse Lavalle.** Light blue; double; early; fragrant.

**Belle de Nancy.** Satiny rose; white center; double.

**Charles Joly.** A bright dark purplish-red to wine-red; large; fragrant; semi-double to double; midseason.

**Charles X.** Dark purplish-red, becoming lilac as the flower ages; while not the largest it is one of the most reliable free bloomers and makes an excellent display; single.

**Hugo Koster.** Violet tinged red, becoming lilac-pink; large florets and good sized cluster; fragrant; single.

**Ludwig Spaeth.** Crimson-purple; one of the darkest; always admired; large; single; rather dwarf habit.

- Madame Lemoine. Fine large double white; rather late.  
 Marie Legraye. Single; pure white; blooms freely.  
 Michel Buchner. Light lilac-blue; double; rather dwarf.  
 Mont Blanc. Pure white; large florets, very large clusters; very fragrant; single; a very fine lilac.  
 Mrs. Edward Harding. Double bright carmine.  
 Negro. Single to semi-double; reddish-purple; dwarfish.  
 Pascal. Single; lavender-pink to light lilac; fragrant; early.  
 Pres. Grevy. Soft blue; double; good size; tall.  
 Reaumur. Lavender-pink to light old-rose becoming deep lavender; single; very large flowers and clusters; fragrant.  
 Volcan. Red tinged purple, becoming deep ruby-purple; large florets, rather long clusters; single; excellent.
- We have limited quantities of other varieties. A list will be sent on request.

## Water Lilies all Summer

To have hardy Water Lilies blooming all summer, beginning in May, you need only a pool, 8-12 in. of soil, a foot of water and sun. When grown in boxes they should be about 8 in. deep and 14 to 16 inches square. Prices 40c up. Write for list.

## Grass, Bermuda

Especially adapted to arid conditions in Southern Missouri and farther south. Stolon, ½ bu., 75c; 1 bu. \$1.25.

Evergreens add winter beauty to the planting

## Hardy Evergreens

Our evergreens are grown with plenty of room and are compact, well filled trees of their size and variety. They have been transplanted and root pruned and are well rooted. They are not grown rapidly and soft but are firm and easily transplanted. They are liberally graded. With the exception of the "mail size" they will be dug with a ball of earth wrapped in burlap, termed "balled and burlapped" or B. & B.

### MAIL SIZES, POSTPAID

Our mail size are transplanted, sturdy little trees, not balled and burlapped as these sizes do not require it. The value of trees cannot be shown in a catalog. A mail size evergreen may be worth a dime or a dollar. It may be a spindling little tree that requires petting, or a well grown tree that with reasonable care gives good results. We intend to give you your money's worth. Plant these mail sizes firmly, water them as the season requires and they should give you good results. They are not yet old enough and large enough to give the immediate effect of balled and burlapped sizes. Give them time to grow into larger sizes and we think they will please you. B. & B. trees cannot be sent by mail.

## Peonies are Easily Grown

Hardy as the oak, Peonies are so easily grown that little need be said. Often, in neglected gardens, one sees large clumps that have flourished and bloomed for years. Yet they amply repay all attention given them. They thrive in almost any good, well drained soil, are best in full sun but succeed with shade part of the day. Plant 3 feet apart. The early varieties usually begin blooming here about May 5 to 8.

The name and date in parenthesis is the originator or introducer and date of introduction. The guards are the wide outer petals. The type of flower is designated as follows:

**Crown.** Wide center or crown petals with narrower, shorter petals forming a collar or ring between them and the guards.

**Bomb.** Center petals of uniform width but narrower than the guards and forming a globe within the guards.

**Semi-rose.** Flowers that would be classed as rose but for an occasional pollen bearing stamen.

**Rose.** Perfectly full, all petals wide, no stamens. The center petals may not be as wide as the guards but if quite distinct it would be a bomb.

### PEONY SIZES AND PRICES

Prices quoted are for good strong divisions of 3 to 5 eyes from blooming plants. We consider them fully equal to one-year plants usually sent out. If you want something larger order 5 to 8 eyes at fifty per cent advance or 8 to 10 eyes at double the printed price. 3 of a kind at dozen rates.

### PEONIES BY PARCEL POST

If wanted by parcel post allow 8c for the first plant and 2c for each additional plant if within 150 miles of Sarcoxie. For the balance of Missouri and adjoining states 10c for the first plant and 3c for each additional plant. For more distant states 15c for the first plant and 8c for each additional plant. Any balance will be refunded.
